Aleksey Kuznetsov

Senior iOS Engineer — Product & Platform

> zummenix@gmail.com | LinkedIn | GitHub | Telegram

English — B2 | Location — Remote (GMT+5) or hybrid in the Yekaterinburg area

Summary

Senior iOS engineer with 13+ years of professional experience across fintech, health, automotive, and event-tech products. I own work end-to-end — architecture, migrations, analytics, tests, and release — and gravitate toward the cross-cutting engineering that lifts a whole platform rather than a single screen. I write documented, tested, readable code, and automate what repeats.

Tech — Swift, Objective-C, UIKit, Swift Concurrency, Combine, XCTest; working knowledge of TypeScript/React, Rust.

Work Experience

Senior iOS Engineer — Product & Platform

> *March 2022 to September 2026 | Кошелёк → Т-Банк (legal employer change, June 2024; same product and team)*

Кошелёк app — 2022 to June 2026

Owned authentication, networking, and platform work for 4+ years on an app of roughly 1M monthly active users — shipping features behind A/B tests with full analytics and automated tests, migrating critical layers, and repeatedly cutting tens of thousands of lines of technical debt.

Selected impact:

- *Leadership* – Tech lead for the iOS team, 2022–2024, through a period of headcount reduction (3 → 1 engineers; I was the iOS developer remaining at the end). Owned technical direction, planning, and code review throughout; mentored and trained the engineers on the team, keeping the area's delivery moving as it contracted.
- **2022** – Onboarding to the codebase: CocoaPods→SPM migration, auth/token refactor, new passcode/biometrics protection, OTP access recovery, account deletion.
- **2023** – Tinkoff ID / SSO authentication platform migration, referential auth, new registration and onboarding, analytics-platform migration, promotions and support-chat features.
- **2024** – Built the entire **"Выгода" (Benefits) tab** from scratch; introduced an iOS wrapper over the company's core A/B and remote-config platform that other teams adopted.
- **2025** – Coupons→Promocodes product consolidation, electronic loyalty-card (ЭЛЛ) issuance, ad opt-out feature, new Balance and Card Catalog screens, networking retry infrastructure.
- **2026** – Shipped the unified advertising platform (T-Ads) rollout and new-user onboarding; completed the networking-layer migration and legacy retirement with no regressions detected.

AI & developer tooling

- Set up and iterated the **Nessy developer-agent** configuration and skills for the repository as an internal initiative alongside product work (2026), including A/B-test and API-method skills for recurring tasks.
- Used AI-assisted tooling in my day-to-day workflow for code generation, test scaffolding, and repetitive refactors on a large Objective-C/Swift codebase.

Т-Банк app — Cards & Clubs (web), June–September 2026

Prepared the Cards and Clubs feature for web technologies: entry points with webview fallback screens and two-way web-to-native communication, plus a new Special Project Entry Point block on the Receipt Offer screen. Fixed web-side bugs while ramping up on TypeScript and React. *Tech* — Swift, TypeScript, React.

---

iOS Engineer

> *November 2021 to March 2022 | Akvelon*

Reddit

Official Reddit app — staff-augmentation engagement via Akvelon

- Contributed to the Objective-C→Swift conversion of the app's core, the modularization of the monolith, and the removal of singleton usages across the app.
- *Tech* – Objective-C, Swift

---

iOS Developer

> *September 2013 to October 2021 | Очень Интересно (Saritasa)*

Developed iOS applications of varying complexity from start to finish; built new features and fixed bugs in existing apps; communicated with backend teams, TMs and PMs; conducted code review; mentored other iOS developers, set and split tasks.

20+ projects over eight years, spanning Bluetooth hardware protocols and firmware updates, real-time sensor graphs, computer vision, and video calls — including ICON Intelligent Control, Masimo Radius T°, Steady Head, DigitalEMS, uSummit, and Helpjess for iPhone.

Full detail for every role and project: EXPERIENCE.md.

Drafted with AI assistance and carefully reviewed, verified, and edited by me.
